

# CMMC Level 1 Evidence Workbook

Practical templates and checklists for internal/external audits

Prepared by: Tech Prognosis

## How to Use This Workbook

This workbook provides auditor-friendly templates mapped to the 17 CMMC Level 1 practices. Each practice section includes: scope notes, what auditors expect, acceptable evidence, a checklist, and placeholders to attach screenshots, reports, and approvals. Complete one section per system in scope that processes, stores, or transmits Federal Contract Information (FCI).

## AC.L1-3.1.2 — Limit access to authorized users (least privilege)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## AC.L1-3.1.20 — Control external connections (remote access/APIs)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## IA.L1-3.5.1 — Identify users uniquely (no shared logins)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## IA.L1-3.5.2 — Authenticate users (passwords/MFA)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## PE.L1-3.10.3 — Escort visitors and monitor access

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## SC.L1-3.13.1 — Boundary protection (firewalls, filters, TLS)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## SC.L1-3.13.5 — Limit public posting of information (no FCI on public sites)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## SI.L1-3.14.4 — Perform periodic and real-time scans

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## AC.L1-3.1.22 — Control information posted on public systems (reinforced)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## SC.L1-3.13.2 — Secure network communications (TLS in transit)

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured (≤90 days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## PM.L1-3.0.0 — Policy & training acknowledgment for Level 1 [workbook helper]

### Scope Notes

Systems/locations in scope for this practice:

System / Tool	FCI Touchpoints (process/store/transmit)	Owner

### What Auditors Expect

- A consistent control is implemented where FCI is handled
- Evidence is current (last 30–90 days) and shows effectiveness

### Acceptable Evidence (Attach or link below)

- Screenshots
- System reports
- Tickets/approvals
- Policies/procedures excerpts

### Checklist

Requirement	Status / Notes
Defined and documented approach exists	
Configured in all in-scope systems	
Monitored/verified routinely	
Recent evidence captured ( $\leq 90$ days)	
Responsible role identified	
Exceptions tracked (if any)	

### Evidence Log

File/Link	Description	Date	Reviewer

## Appendix A — One-Page FCI Identification Checklist

Use this to label artifacts as FCI before storage or transmission.

Question	Yes/No
Provided by or generated for the Government under a contract	
Not intended for public release	
More than simple payment/transactional info	
Contains contract identifiers or performance details	
Appears in email, tickets, logs, reports, or shared folders	
Flow-down needed to subs who may touch this information
